CANADA**
CRAFT CANNABIS

INTRODUCING

Where medical cannabis
meets craft quality.

Founded in 2013, Whistler Cannabis Co. holds the distinction of being one of Canada's original ten licensed producers, with a proud legacy of growing premium, indoor craft cannabis.

Our cultivation process begins in our state-of-the-art facility with optimal lighting, nutrients, and environmental conditions. Grown in small batches using top-tier genetics, each plant is harvested at its peak and hang-dried over several days. This slow, controlled drying process preserves the plant's delicate trichomes—which contain most of the plant's aroma, cannabinoids, and active compounds.

Each Whistler jar includes a 2-way humidity regulator to maintain ideal moisture and freshness, so the quality we cultivate is the same quality patients receive.

- Premium craft quality cannabis, grown in small batches using top-tier genetics
- Hang-dried, hand-trimmed, with a slow controlled drying process to preserve delicate trichomes
- From Canada's #1 trusted provider of medical cannabis
